Only if issue is published on batches, such aop or rolling pass, you should inform **from date** to generate XML for the article published from this date to the current date.

Then click on OK button.

According to the example, the program will create the file: v:\scielo\serial\rsp\v48n5\PubMed\rsp-v48n5-20160510-20160523.xml, containing articles which have epub date between 20160510 and the current date.
